SECTION 3: FREEDOM TO OPERATE OPINIONS

BioPharma Industries manufactures generic pharmaceutical formulations. For each product, the Company has obtained legal opinions confirming freedom to operate.

3.1 SAMPLE FREEDOM TO OPERATE OPINION

LEGAL OPINION: FREEDOM TO OPERATE

Product: Atorvastatin Calcium Tablets 10mg/20mg/40mg/80mg

Prepared By: M/s. IP Rights LLP, Patent and Trademark Attorneys

Date: March 15, 2017

Reference: IPR/FTO/BIO/2017/ATOR/001

EXECUTIVE SUMMARY:

Based on our review of the patent landscape, we opine that BioPharma Industries Limited is free to manufacture, market, and sell Atorvastatin Calcium Tablets in the Indian market and for export to non-regulated markets.

ANALYSIS:

1. ACTIVE PHARMACEUTICAL INGREDIENT (API):

Original Innovator: Pfizer Inc. (Brand: Lipitor)

Original Patent: US Patent No. 4,681,893 (Compound patent)

Indian Patent Status: No compound patent granted in India (pre-2005)

Expiry in USA: November 2011

Status: API is off-patent globally

2. FORMULATION PATENTS:

A search of the Indian Patent Office database and global patent databases was conducted for formulation patents covering atorvastatin tablets.

Patents Identified: 12 formulation patents globally

Patents in India: 3 patents granted

Analysis of Indian Patents:

a) IN 234567 - Controlled release formulation of atorvastatin

Patentee: XYZ Pharma

Expiry: 2025

Relevance: NOT RELEVANT - BioPharma's product is immediate release, not controlled release. Different formulation approach.

b) IN 345678 - Combination of atorvastatin with ezetimibe

Patentee: ABC Labs

Expiry: 2026

Relevance: NOT RELEVANT - BioPharma's product is single entity atorvastatin, not a combination product.

c) IN 456789 - Stabilized atorvastatin formulation using specific excipients

Patentee: PQR Healthcare

Expiry: 2024

Relevance: POTENTIALLY RELEVANT - Patent claims specific combination of excipients for stability.

Detailed Analysis: BioPharma's formulation uses different excipients and different ratios. Patent claims are limited to specific excipient combination. BioPharma's formulation does not infringe the claims.

CONCLUSION: NO INFRINGEMENT

3. MANUFACTURING PROCESS PATENTS:

No process patents identified that would restrict manufacture of atorvastatin tablets using conventional wet granulation process.

4. CONCLUSION:

Based on the above analysis, we opine that:

a) The API atorvastatin calcium is off-patent and freely available.

b) BioPharma Industries' formulation of Atorvastatin Calcium Tablets does not infringe any valid and subsisting patent in India.

c) BioPharma Industries is free to manufacture, market, and sell Atorvastatin Calcium Tablets in India and export markets.

d) For regulated markets (US, EU), separate patent analysis considering local patent laws should be conducted.

LIMITATIONS:

- This opinion is based on patent search conducted as of the date hereof.
- New patents may be granted after this date.
- This opinion covers India only.
- Trademark and regulatory aspects are not covered.
